

I totally agree Proceeding RM-10811 put forward by the FISTS organization on keeping and increasing the morse code requirements for amatuer licensing and increasing technological knowledge for the higher class licenses. I am an amatuer radio operator and operate entirely in morse code. I am a member of amatuer emergency service organizations in two counties in Georgia, and morse code ability is a needed skill to be able to effectively carry out our mission in times when emergency communications are necessary.
